

Motor Storage

How to store your kart engines safely.

- Draining the crankcase and remove sump cover.
- Use carb cleaner and wash out the inside of the block.
- Blow dry and then spray everything well with WD-40.
- Spray WD-40 it in spark plug hole, in carb throat, in fuel tank and also in vent tube.
- Cover fuel cap, carb, pipe and vent tube with heavy tape.
- Store in a controlled atmosphere...It will be fine then for next year.
